Instructions for environment setup

1. If you haven't already, install VirtualBox (https://www.virtualbox.org/).
2. Download the virtual machine image with the environment that you will be working on, Cogrob Summer School - 2017.ova, at
   https://www.dropbox.com/s/wimjkl44hpsr0ij/Cogrob%20Summer%20School%20-%2020017.ova?dl=0
3. Load the above image in VirtualBox and start the virtual machine.
   username: student
   password: student
4. Fill out the license agreement here:
   https://goo.gl/forms/fd3JRG60yLouq17J2
5. We will email you the private key after you have filled out the agreement. Follow the instructions in the email to save the private key.
6. After completing 4 and 5, in the virtual machine, run the command "update-vm" and then close and reopen all terminals (sometimes the .bashrc file needs to be updated).
   -- Use LXTerminal (right-click and add to desktop for convenience) under System Tools.
7. You're all set to go!
